- (1) For contingent liabilities and commitments, the contract amount represents the amount at risk should the contract be drawn upon and the client defaults. The total contract amount is not representative of future liquidity requirements.
- (2) For derivatives, the notional amounts indicate the nominal value of transactions outstanding at the reporting date, not the amounts at risk.
- (3) In deriving the replacement cost of derivatives, no effect of bilateral netting arrangements has been taken into account.

C) International claims

The international claims by geographical segments are categorized in accordance with the residence of the counterparties.
